LINEAGE POWER SIGNS DISTRIBUTION AGREEMENT WITH BMF SYSTEM PARTS

Nuenen, Netherlands and PLANO, TX, USA – November 9, 2011 -

Lineage Power Corporation, a GE Energy company, today announced that it has entered a distribution agreement with BMF System Parts, a reseller of power conversion solutions based in Benelux. The agreement allows BMF System Parts to distribute Lineage Power's® end-to-end, Total Efficiency™ architecture, AC-DC power supplies and DC-DC board mounted power modules for Original Equipment Manufacturers (OEMs) throughout Belgium, Netherlands and Luxembourg.

"BMF System Parts helps customers minimize their new product time to market and capitalize on growth opportunities. We accomplish this by working with a select group of leading manufacturers," said Marcel Visscher, Sales Manager, BMF System Parts. "We are pleased to expand our portfolio to include the innovative and reliable power conversion solutions offered by Lineage Power."

"The proven technical engineering team and reputation for outstanding customer service make BMF System Parts an ideal distribution partner in The Netherlands," said Peter Raadsen, EMEA Director of Sales and Marketing for Lineage Power. "Our digital power platforms offer OEM customers the size, efficiency, and cost advantages they require, while

dramatically reducing sourcing risk and improving power conversion reliability.”

About Lineage Power

Lineage Power traces our nearly 100-year heritage of innovation to Bell Labs. We deliver reliable and intelligent power conversion solutions for cloud computing and mobile internet infrastructure with energy-efficient AC-DC power supplies, DC-DC circuit board mounted power modules, telecom energy systems, DC datacenters, and custom power products backed by local field expertise in 25+ locations worldwide. Designed for decades of non-stop operation, the high-availability Total Efficiency™ architecture DC power conversion solutions enable voice, video and data communications while assuring investment protection, total system efficiency, and significantly reduced total cost of ownership. Our customers include leading U.S. telecom service providers, such as AT&T, Verizon Wireless and Verizon, and leading global OEMs, such as Alcatel-Lucent, Cisco, Ericsson, Hewlett Packard, Huawei, Juniper Networks and Oracle. More information about Lineage hardware, software, services and training is available at www.lineagepower.com.

About BMF System Parts

BMF System Parts was established in Nuenen, The Netherlands in 2008. A young distributor company with experienced technical sales people focused on demand creation serving their local market. Through close relationships with their customer engineering teams, BMF System Parts offer best in class technical solutions and ensure the best design-in support to help customers meet their design criteria and timescales. By ensuring good product availability from evaluation samples, to prototype quantities through to volume manufacture, BMF System Parts help customers minimize their time to market and help them capitalize on market opportunities.
