

Product world of the Heat Sink Group.

„Heat Sink Group means profile diversity.“

More than the standard. Extruded coolers, power coolers or fluid coolers.

Heat Sink Group has the right solution.

1. Extruded cooler

Heat Sink Group means profile diversity - As standard, we have a wide range of profiles that we have in stock or can procure as quickly as possible.

In addition to the standard, we are able to implement any new profile entirely according to your wishes. As a hybrid company, we offer the right solution for your needs and wishes: Price-appropriate, quality-conscious and with a plus in service.

2. Power cooler

The special class and only available from us! The solution variants between extruded and fluid coolers.

Peeled, bent or joined. Here, too, the Heat Sink Group has a unique selling point. The group of power coolers is only available from us: we have the right solution for you. Depending on the application, we offer you our peeled Flexfin SKIVING heat sink, our curved sun profile or our connected Vario system.

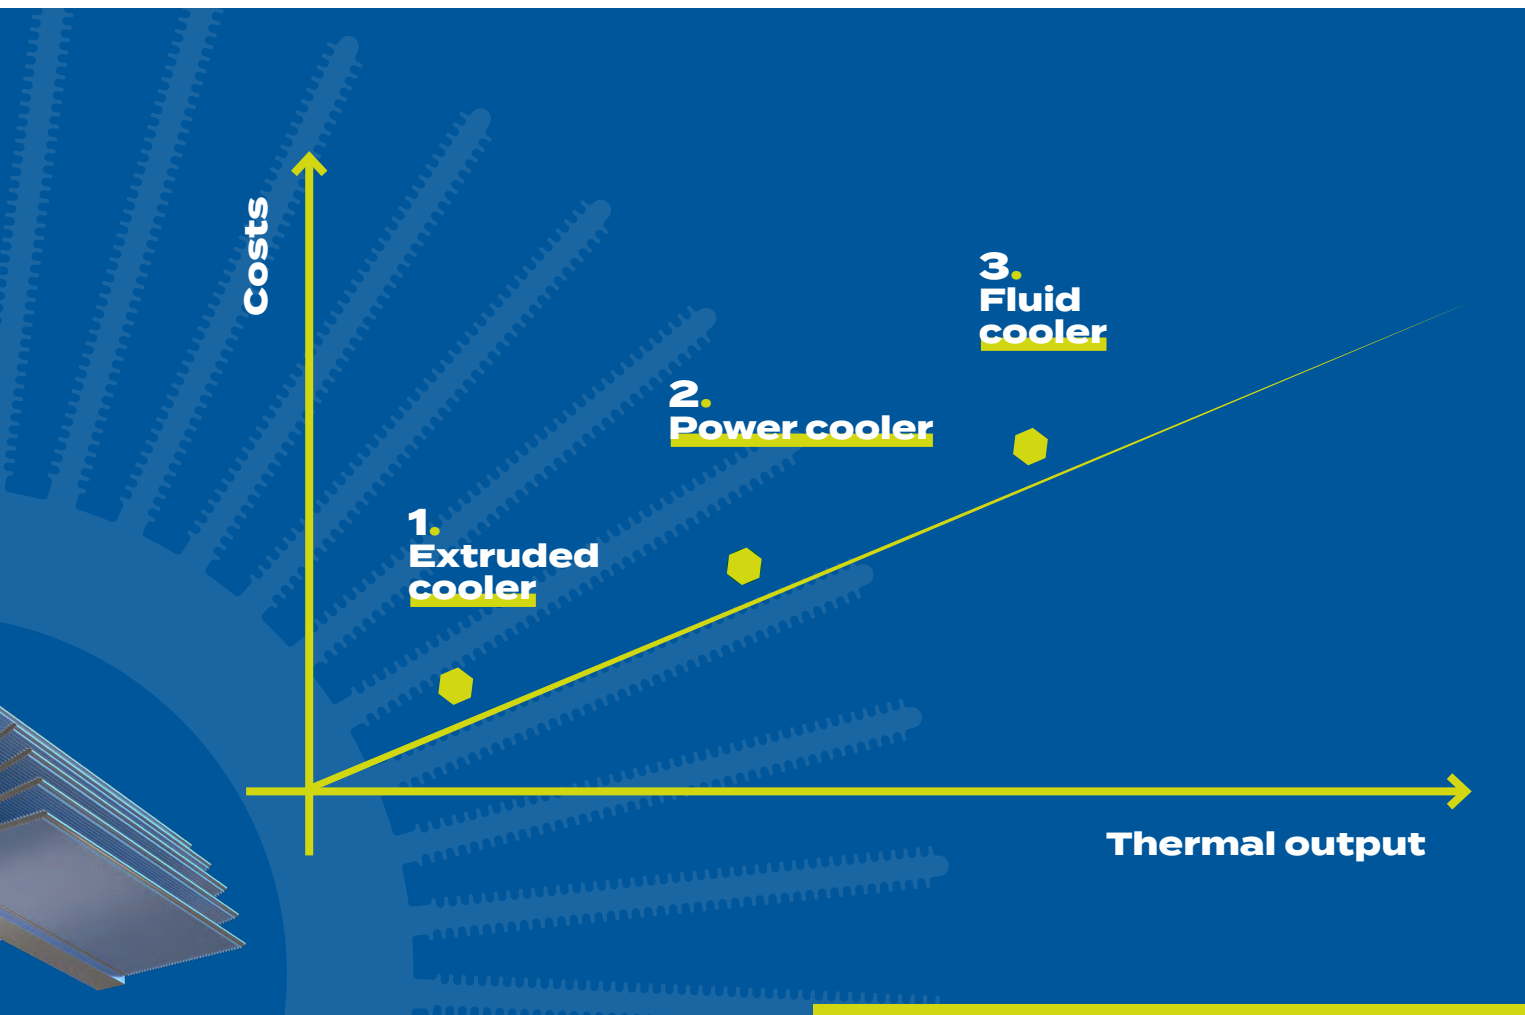

Find out more on page 2.

3. Fluid cooler

We realize what you need. From standard to special requests, including design and simulation.

Designed, simulated, tested and produced. We offer the entire range of fluid coolers, from standard coolers to any special request. We produce in Ennepetal and use synergies worldwide to give you the best possible price-performance ratio.

We are happy to support you from the preliminary project phase through to delivery.

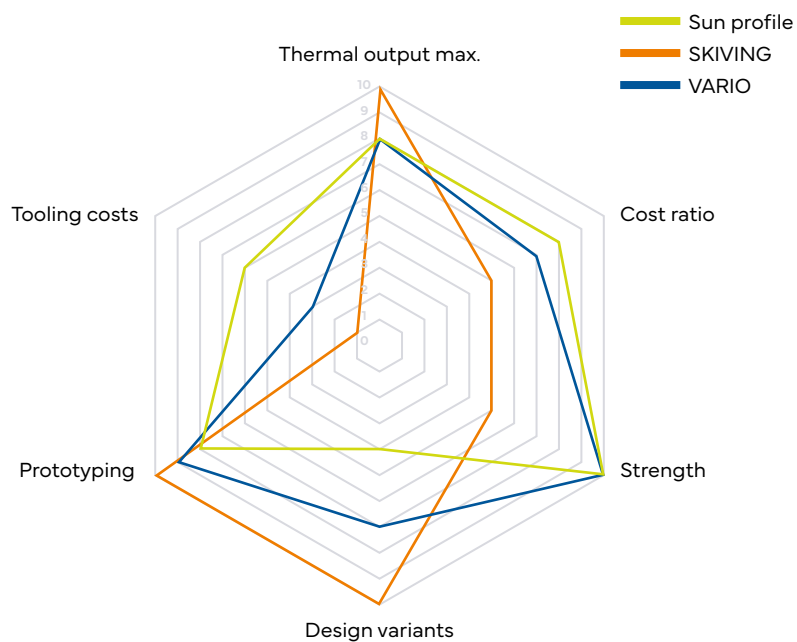

Power cooler

When normal extruded profiles reach their limits in terms of production technology and fluid solutions are not economical, our power coolers offer a unique group of solutions: each power cooler system has its own advantages and is designed by us according to requirements.

They have one essential feature in common: a lot of surface area in a very small space. In detail, they differ in the following features:

- Thermal output
- Cost ratio
- Strength
- Design variants
- Prototyping
- Tooling costs

Sun profile heat sinks, Flexfin-SKIVING heat sinks and Seifert-Vario in comparison, depending on the application - Heat Sink Group has the right solution!
